EDUCATION

The University of Chicago

Chicago, IL

Bachelor of Science in Computational and Applied Math and Computer Science (Systems Specialization) | GPA: 3.9/4.0 Expected, June 2027

- **Financial Markets Program:** Selective, three-year program focused on building quantitative finance acumen through weekly workshops, personalized advising, employer visits and coursework at the Chicago Booth School of Business
- **Relevant Coursework:** Database Systems, Operating Systems, Computer Architecture, Algorithms, Linear Algebra, Math for ML

EXPERIENCE

Apex Fintech Solutions

Software Engineer Intern

Chicago, IL

June 2026 – August 2026

- Built and launched a loan rerate opportunity tool for securities lending traders, comparing contracts against market rates and profitability to surface opportunities using configurable thresholds.
- Designed and deployed a Go microservice on GKE backed by PostgreSQL and integrated via gRPC; contributed Terraform infrastructure and implemented Datadog production alerts.
- Owned the feature end-to-end through production, building the React/TypeScript trader interface, incorporating direct user feedback, and adding extensive tests; leveraged Claude Code throughout development.

Recreaish

Software Engineer Intern

Chicago, IL

Apr 2025 – Aug 2025

- Built end-to-end payments infrastructure with Stripe Connect, supporting account onboarding, payment processing, and platform fee routing.
- Developed real-time game and notification updates with Socket.IO, broadcasting creation, edits, joins/leaves, and other user events across the platform.
- Built backend systems in Go and PostgreSQL for game lifecycle management, including a concurrent time-based job scheduler and optimized schemas and queries for gameplay and notification features.

Adventures with Mr. Math

Lead Teacher Assistant

Oak Brook, IL

August 2019 – June 2024

- Managed logistics for nation-wide math competitions and assisted teachers in competitive math lessons for students across the country
- Mentored students individually on advanced mathematical topics and problem-solving techniques

PROJECTS

Hoops Head 2 Head Online Game

Full-stack Developer

Oak Brook, IL

June 2024 – September 2024

Developed an online multiplayer trivia platform where users connect two NBA players through mutual teammates.

- Built a multiplayer NBA trivia game where users try to connect two players through as few mutual teammates as possible.
- Developed a UI written in React.js that calls a multiplayer platform using Flask and WebSockets
- Stored player data collected through web-scraping various NBA Statistics websites in a Neo4J graph-based database
- Technologies: Python, React.js, Google Cloud Platform, Neo4J, AuraDB, socket.io

LEADERSHIP & ACTIVITIES

Phoenix Funds

Team Member

Chicago, IL

October 2023 - September 2024

- Explored and studied various aspects of financial theory, including accounting, futures/options, sales & trading, and valuation processes.
- Researched defense sector equities and presented a valuation on Lockheed Martin, including an industry overview and assessment of competition/similar companies.
